IMDG Code

### Classification and MSDS Research (Material Safety Data Sheets)

With our in-depth knowledge and extensive resources, we are able to decipher these documents and correctly assign hazard classes, UN numbers, and proper shipping names when they are not provided. This is the most important step in properly declaring a hazardous material shipment.

### Dangerous Goods Documentation

DGM New York takes on the liability of issuing dangerous goods documentation on behalf of the shipper for air, ocean and ground shipments.

### 24-Hour Emergency Response Number

DGM New York provides emergency response service to comply with federal and industrial requirements.

### Packing and Re-Packing for All Types of UN Specification Packaging

- 4G and 4GV fibreboard boxes
- 4C1 and 4C2 ordinary boxes of natural wood
- 4D plywood boxes
- 1G fiber drums
- 1A1 and 1A2 steel drums
- 3H1 and 3H2 plastic jerricans
- 6HA1 and 6HA2 plastic receptacle with outer steel

### Marking and Labeling

We correctly mark and label packages as required in order to reflect the information on the shipping documents.

### Corrective Marking and Labeling

Our staff is trained to identify and correct discrepancies on other shipper's packages.

### Custom Marking of Packages

We can accommodate any customer's request for unique marking and labeling needs.

### TSA compliant pre-flight/tender inspection of other shipper's cargo.

DGM New York guarantees that your shipments won't be rejected by the accepting carrier.
